Nail Bar : 2.3kg

Raising Awareness...

...finding and eliminating POTENTIAL KILLERS

...but it's STILL HAPPENING

...when is the best time to do something about it?

Who is responsible?

Dropped objects can occur everywhere...

Some potentials more obvious than others...

...some where it's only a matter of time...

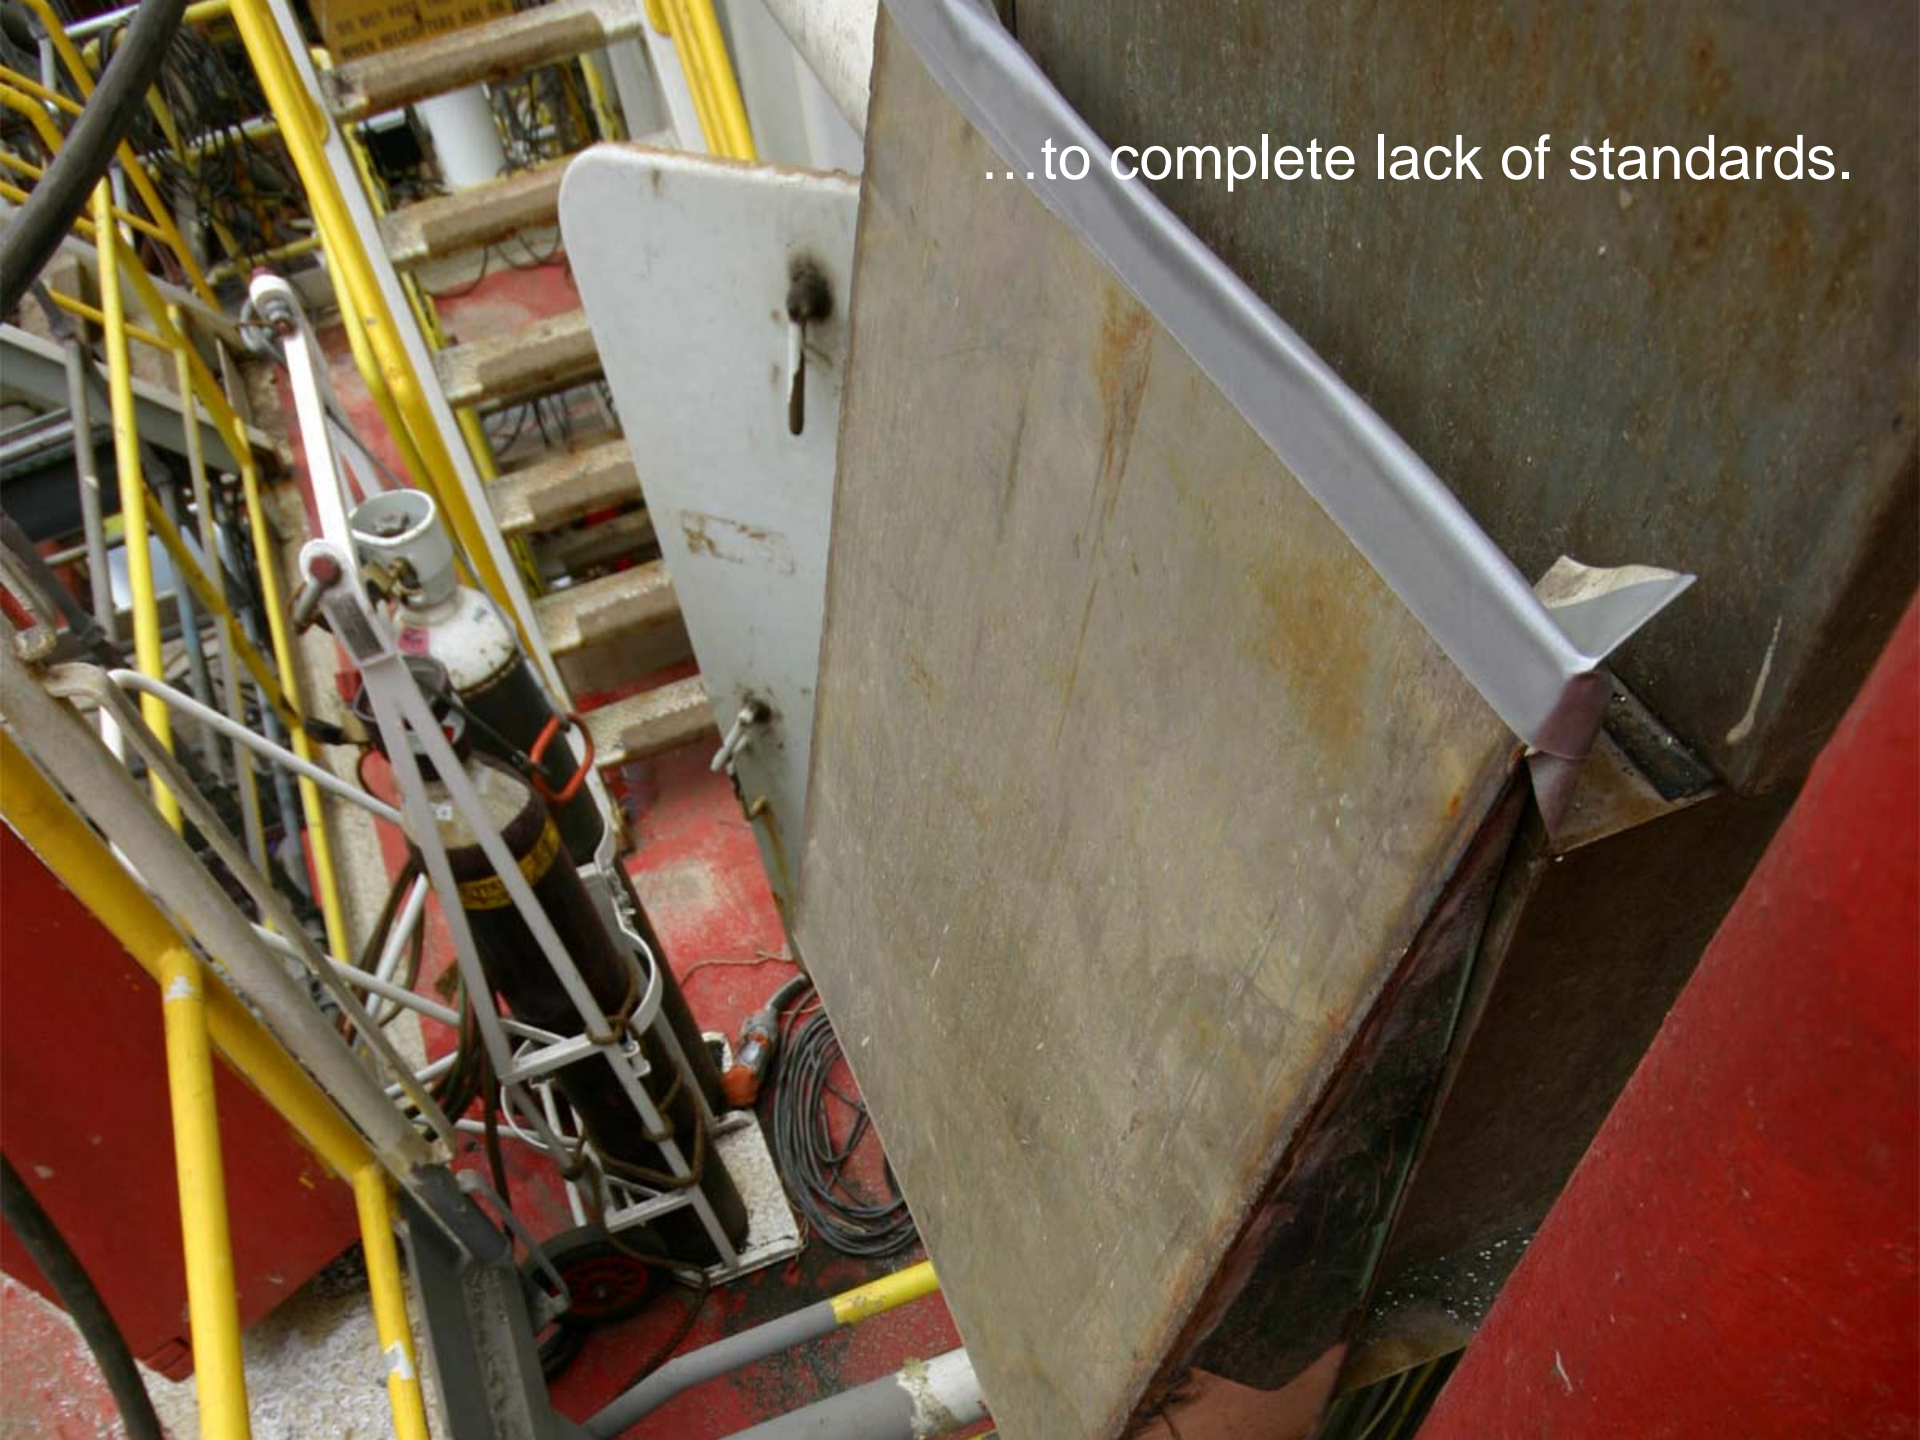

...from poor safety culture...

...to complete lack of standards.

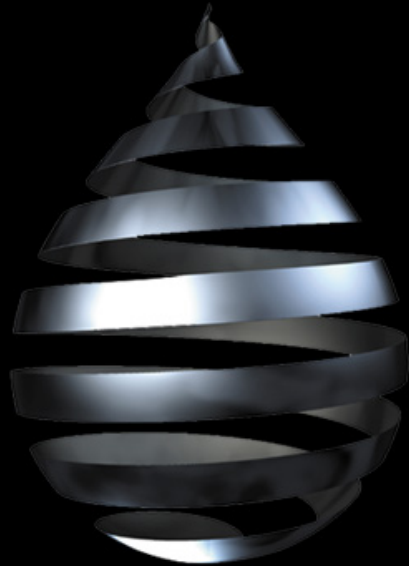

...how long do we have to wait to do something about it?

DROPPED OBJECTS

STILL HARMING
STILL KILLING

THANK YOU
