DROPS SAUDI CHAPTER IS ON!

Throughout history, dropped objects have been a major cause of incidents and near misses. This is especially so in the oil and gas industry. Simply put, these incidents are a scourge and we must eliminate them for good.

They are not just a contractor’s or a client’s problem in our own industry - they are a common problem in almost every industry!

DROPS Work Groups

Common problems require common solutions. It includes your company, and it includes you! DROPS Saudi will initiate work-groups that will be assigned to multiple projects in the near future. Solutions will not just be practiced by groups, but by every individual who is involved in the industry.

DROPS Events

DROPS Saudi Chapter will be initiating and promoting events with the central focus on DROPS prevention, mitigation and control.

DROPS Statistics & Information

Dropped objects are regularly the principal causes of incidents in the oil and gas industry and contribute to the total risk level for offshore and onshore facilities. We need to take action to prevent any more fatalities and injuries.

Today, “DROPS are in the top three causes of injury or fatality in the oil and gas industry” - DROPS International
