

Drops designed into New Builds

Drops and materials handling

Functional requirements to be included in specification.

Mitigating the high impact collision risk!

- Eliminate obstacles on main deck.
- Apply philosophy
- Eliminate as much as possible deck to deck crane operations.
- Model operations and and apply SJA.

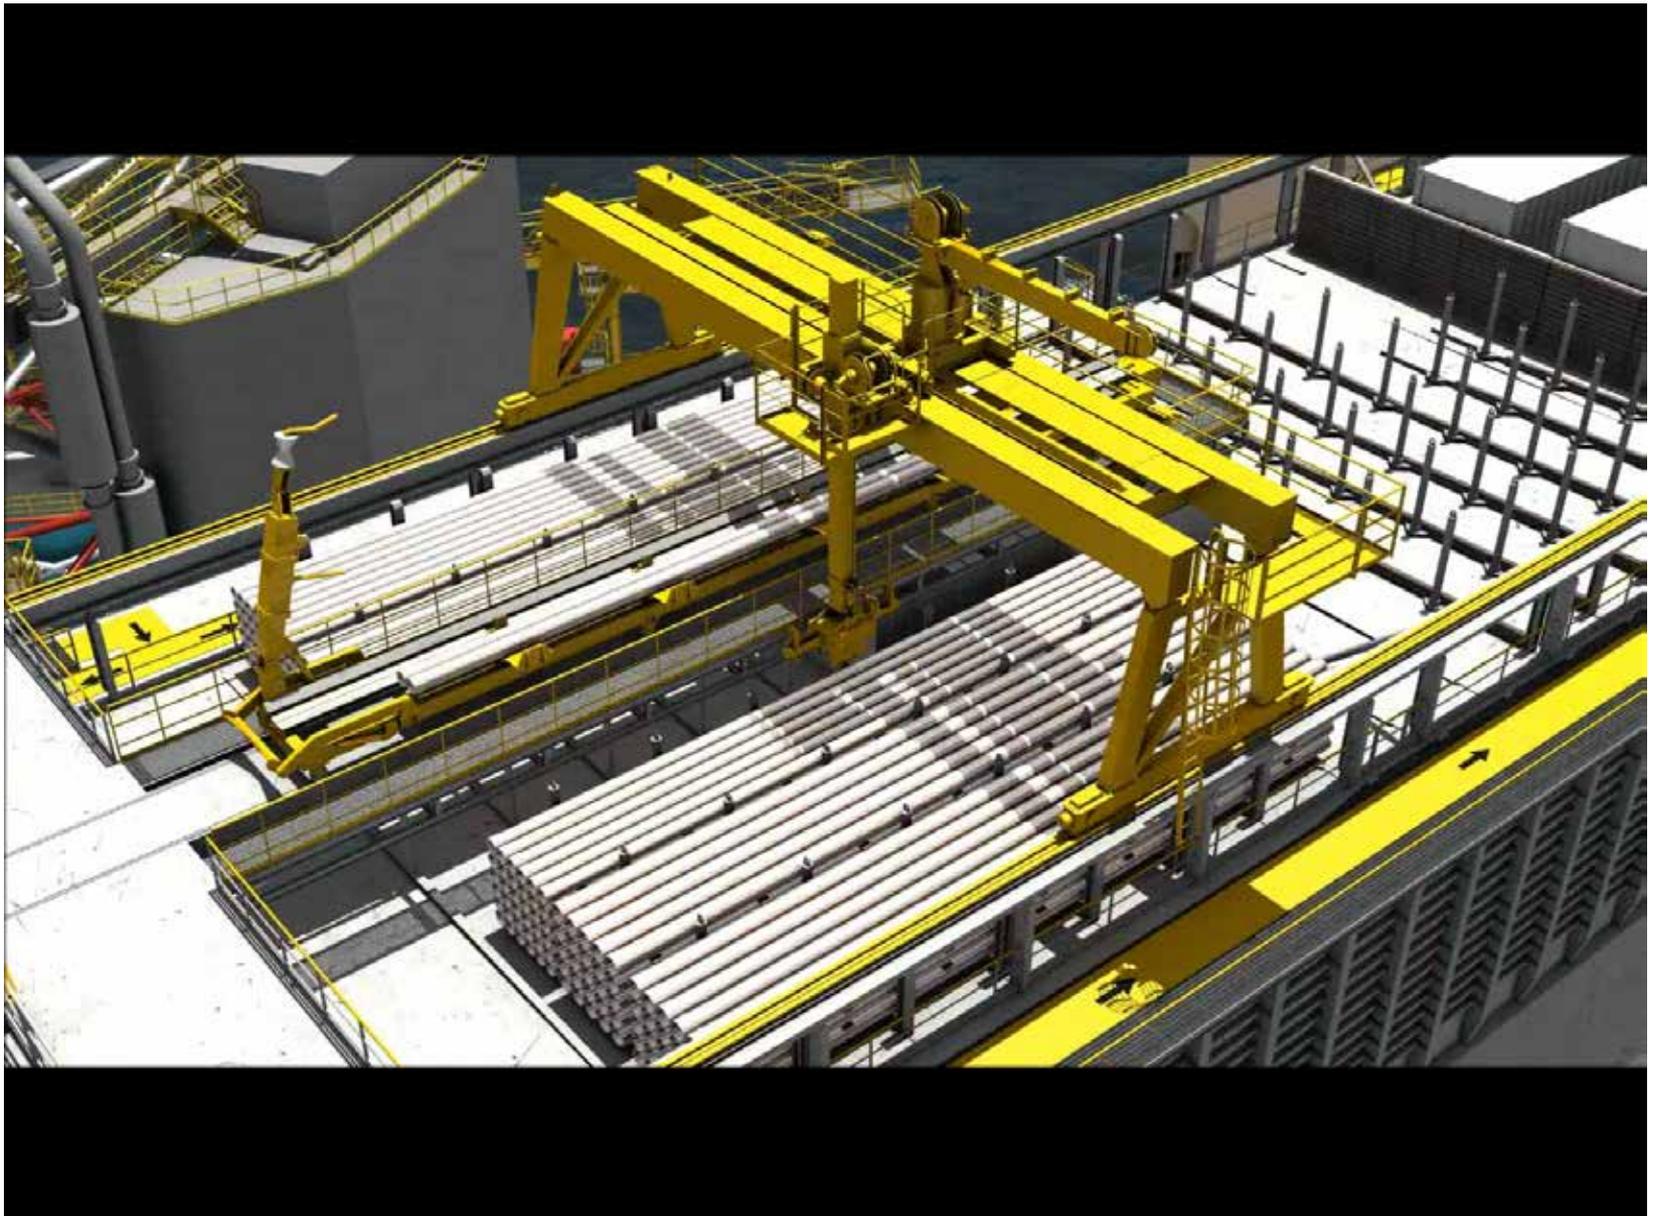

Types of Operations generating DROPS

- Collisions with equipment
- Materials handling
- Crane servicing the drill floor
- Pipe handling
- BOP handling (Dropped objects on Platform)

BOP handling

- Fully enclosed workshop environment.
- DROPS risk on platform eliminated steel floor plating.
- BOPs moved by transporter instead of hoists.
- Overhead transvers cranes.
- Skidding arrangements for wellheads.
