

BRACE YOURSELF
WINTER
IS COMING

ICE AND SNOW

Ice and snow can build up on structures, derricks, roofs and towers and pose a serious threat

Regularly clear any build-up of ice or snow from structures, walkways, steps, scaffolding etc

Remove ice and snow from containers, skid bases, forklift pockets and loads prior to loading

Carefully remove icicles. If they cannot be removed, rope off area below and use warning signs

Be aware that vibration of structures and regular jarring of derricks can shake ice loose

CHOOSE YOUR FUTURE MAKE A DIFFERENCE
